Question: 2

What is the minimum number of characters the passphrase must have, in order to enable hardware encryption using the T10 standard?

A. 8 characters

B. 16 characters

C. 32 characters

D. 128 characters

Answer: B

Hardware encryption that uses the T10 standard requires 256-bit AES. Backup Exec does not let you enable hardware encryption for a job unless it uses at least a 16-character passphrase.

Question: 3

Media can be deleted from which media set?

A. Scratch Media

B. Retired Media

C. Backup Exec and Windows NT Backup Media

D. Foreign Media

Answer: B

https://www.veritas.com/support/en_US/article.TECH5409

The Retired Media set is the only location where media can be deleted from Backup Exec (TM). Deleting media will remove all references to that media in Backup Exec, excluding Restore Selections. This does not present any barrier to restore functions, it simply means that Backup Exec will not allocate any resources to track the use of the media in question.

Question: 4

Which command must an administrator use to start the Agent for Linux daemon?

A. /etc/VRTSralua/RALUS.init start

B. /etc/init.d/VRTSBE.init start

C. /etc/init.d/RalusAqent.init start

D. /etc/init.d/VRTSralua.init start

Answer: D
